

Stop and Reflect–Jere' Mondau

Medium–Steel and copper

\$3,200

sculpt 5 ture

This bench is just as functional as Mondau's other sculptured bench, but it is an entirely different design. This bench is constructed of two different materials, rusted steel and acid-etched copper tubing. When you look closely at the tubing, you can see many subtle colors. Touch the sides of the bench and then the seat. What textures do you feel? Which do you prefer? What materials would you use to build a bench?
